Note: Revisions to the forecast of cash dividends most recently announced: None

3. Consolidated earnings forecasts for the fiscal year ending March 31, 2024 (from April 1, 2023 to March 31, 2024)

(Percentages indicate year-on-year changes.)

	Net sales		Operating profit		Ordinary profit		Profit attributable to owners of parent		Basic earnings per share
	Millions of yen	%	Millions of yen	%	Millions of yen	%	Millions of yen	%	Yen
Fiscal year ending March 31, 2024	80,386	7.9	10,610	7.8	10,644	6.9	7,233	(1.1)	18.67

Note: Revisions to the earnings forecasts most recently announced: None

* **Notes**

- (1) Changes in significant subsidiaries during the period (changes in specified subsidiaries resulting in the change in scope of consolidation): None
- (2) Adoption of accounting treatment specific to the preparation of quarterly consolidated financial statements: None
- (3) Changes in accounting policies, changes in accounting estimates, and restatement
- (i) Changes in accounting policies due to revisions to accounting standards and other regulations: None
 - (ii) Changes in accounting policies due to other reasons: None
 - (iii) Changes in accounting estimates: None
 - (iv) Restatement: None

(4) Number of issued shares (common shares)

- (i) Total number of issued shares at the end of the period (including treasury shares)

As of June 30, 2023	450,880,000 shares
As of March 31, 2023	450,880,000 shares

- (ii) Number of treasury shares at the end of the period

As of June 30, 2023	63,439,188 shares
As of March 31, 2023	63,439,188 shares

- (iii) Average number of shares outstanding during the period (cumulative from the beginning of the fiscal year)

Three months ended June 30, 2023	387,440,812 shares
Three months ended June 30, 2022	387,396,212 shares

Note: The Company has introduced a stock compensation plan, and in calculating the number of treasury shares of common shares at the end of the period and the average number of shares outstanding during the period, the number of treasury shares includes shares of the Company held by Japan Custody Bank, Ltd. (the Trust Account) as trust assets for the “Trust for Granting Shares to Directors” and the “Trust for Granting Shares to Executive Officers.” The number of treasury shares held by the Trust Account included in the number of treasury shares at the end of the period ended June 30, 2023 and March 31, 2023 were 1,567,700 shares, and the number of treasury shares held by the Trust Account excluded from the calculation of the average number of shares outstanding during the three months ended June 30, 2023 and three months ended June 30, 2022 is as follows: the average number of treasury shares of common shares held by the Trust Account for the three months ended June 30, 2023 and three months ended June 30, 2022 were 1,567,700 shares and 1,622,086 shares, respectively.

* Quarterly financial results reports are exempt from quarterly review by certified public accountants or an audit corporation.

* Proper use of earnings forecasts, and other special matters

Forward-looking statements in this material, including earnings forecasts, are based on information currently available to the Company and on certain assumptions deemed reasonable. Actual results may differ significantly due to various factors. For assumptions underlying the forecast and cautions regarding the use of earnings forecasts, please refer to “1. Qualitative information on quarterly financial results, (3) Forward-looking forecasts, such as consolidated earnings forecasts” on page 5 of the Attached Materials.

1. Qualitative information on quarterly financial results

Matters discussed here that are not historical fact reflect judgments made as of the end of the quarter of the fiscal year under review.

(1) Operating results for the period under review

During the three months ended June 30, 2023 (April 1, 2023 to June 30, 2023), the Japanese economy was on a gradual recovery trend, particularly individual consumption, as economic and social conditions returned to normal following the COVID-19 pandemic. However, central banks in various countries are continuing with monetary tightening to combat global inflation caused by surging resource and raw materials prices, and there is increasing risk of a downturn in the overseas economy.

Given these conditions, the Group recognizes that improving productivity is a key issue in securing earnings amid high inflation. In addition to focusing more on recurring revenue businesses, the Group is continuing to expand businesses with high added value such as consulting operations and PMO projects aimed at promoting DX in the software development business.

Furthermore, we will continue to invest proactively in human resources, improve wages and working conditions, and pursue initiatives for the stable acquisition of excellent human resources.

In the Solution Design Business, the Group continued to focus on expansion in the in-vehicle, Internet business, products, and DX fields, where significant growth is expected. Here, the Group worked to further increase orders and improve profitability.

In the Framework Design Business, the Group deployed its system development expertise from the financial sector to customers in the public and distribution/services sectors, and worked to increase orders in the business application development and infrastructure (cloud) architecture operations.

In the IT Service Business, the Group focused on providing PMO services related to the introduction of various tools and business process improvements in response to IT outsourcing demand from companies creating new business models and companies working on reform of work styles.

In the Business Solution Business, the Group focused on service businesses, not product-oriented businesses, and strove to further strengthen its recurring revenue businesses, centered on the subscription business and system development and support.

In the Cloud Business, which is responsible for promoting the subscription business model, the Group expanded the functionality of its in-house products Canbus^(*) and Cloudstep^(*) and actively offered a “DX Design Lab” that supports DX promotion from project consulting.

As a result of the above, consolidated results for the first quarter of the fiscal year under review were net sales of ¥18,734 million (up 6.3% year on year), operating profit of ¥1,909 million (up 4.8% year on year), ordinary profit of ¥1,781 million (down 5.2% year on year), and profit attributable to owners of parent of ¥1,220 million (down 5.0% year on year).

(*) Canbus. and Cloudstep are Systema’s original services.

The following describes performance by segment. Note that net sales for each segment include inter-segment net sales or transfers.

(i) Solution Design Business

The Solution Design Business is divided into five categories: in-vehicle, social infrastructure, internet business, products, and DX services. In the first quarter, the Group worked to strengthen both cooperation with our business partners and resource procurement. The Group also increased the number of personnel in the overall Solution Design Business through aggressive hiring. While the Group is working to win orders from clients with robust development motivation, development projects concluded for some of our clients, and the focus has been on launching new projects. However, some unprofitable projects impacted financial results, and net sales in the Solution Design Business were ¥5,223 million (down 1.9% year on year), and operating profit was ¥364 million (down 47.1% year on year).

(In-Vehicle)

In the in-vehicle category, the importance of mobility software is increasing in the automobile industry, and there is robust development demand for in-vehicle infotainment and integrated cockpit systems. Using the Group’s technical capabilities in software development acquired in the mobile field, we are strengthening our development system to meet the demand of Japanese finished vehicle manufacturers and Tier-1 suppliers. New project launches are progressing, and going forward we will focus on expanding mobility development orders received for next-generation applications.

(Social Infrastructure)

In the social infrastructure category, which supports the mechanisms of society, including telecommunications infrastructure, payment infrastructure, transportation infrastructure, power grids, and more, and enriches people's lives, the Group used our experiences in embedded systems and web design developed in the in-vehicle and product fields to increase orders received related to power grids and aerospace. While continuing to focus on projects related to power grids and aerospace, the Group will also promote expansion into local governments and the public sector.

(Internet Business)

In fields related to the Internet business category, such as Internet services and e-commerce, large-scale development projects using 5G in the Internet services field concluded, and demand is also settling. Meanwhile, the Group is receiving inquiries from companies looking to strengthen their services further and is focusing on strengthening total solutions that can provide everything from planning, to development and evaluation, to IT consulting and services. Moreover, while there were unprofitable projects in this category, they are nearing conclusion.

(Products)

In the products category, which engages in development, including smartphones, home appliances, and robotics, the Group received numerous inquiries related to the keywords "AI" and "IoT," strengths of the Group. The Group's one-stop support for the entire product lifecycle of not only product development and quality evaluation, but also environment construction and support, has been well received. The Group will continue to expand orders received while diversifying itself from competitors.

(DX Services)

In the DX service field, the Group has received many inquiries for system development with superior flexibility and expandability such as the optimization of work processes and data use and operational streamlining through AI and automation as demand increases for undertaking DX (the concept of improving all aspects of life and business through permeation of information technologies). In addition, the Group will continue to actively promote the development of its in-house services, such as Remo-oTe, which utilizes the Group's business experience and total solution strengths cultivated in various fields, TimeTapps, a cloud attendance management system, and Palette.Link, a groupware that enhances the quality of relationships, as they have been receiving many inquiries.

(ii) Framework Design Business

In this business, the Group harnessed its track record in application development in the financial sector to expand the scope of its offerings to customers in the public sector, distribution/services, and in social infrastructure, leading to an increase in orders for system development projects.

In the financial sector, the Group provides core system development services for customers in the banking industry and life and non-life insurance industries. In addition to long-term development work in areas such as contract management systems and accounts systems, the Group achieved greater orders by increasing inquiries for DX projects such as migration of core systems to the cloud and host migration.

In the public sector, orders were received for new projects, primarily related to central government ministries and agencies, and the respective business areas of system development, infrastructure construction, and operation and maintenance remain firm. In the first quarter, orders received for projects for local governments made progress, and the Group intends to further expand this area as one of the pillars of this business.

In addition, for general corporate clients, the Group is moving forward with proposals for technical support services using low-code development tools and system rebuilding focused on migration. The Group's "laboratory system" for total system support, from proof of concept support in the system planning stages to operations and maintenance after system development, has led to an increase in orders.

As a result, net sales in this business amounted to ¥1,619 million (up 13.9% year on year) and operating profit was ¥351 million (up 47.5% year on year).

(iii) IT Service Business

In this business, which mainly operates a variety of IT-related outsourcing services, including system operation and maintenance, helpdesk and user support services, and PMO, to respond to IT outsourcing demand from companies that are creating new business models and working on work style reform, the Group focused on provision of PMO services to provide project management support for implementing a variety of tools including cloud solutions and improving business processes.

In the software testing services business, the Group worked to increase orders and improve profitability based on its service track record provided in each process, from software testing consulting to debugging, not only for customers who provide consumers with web apps and mobile games but also customers who provide business systems to companies.

In addition, regarding promoting engagement of persons with disabilities, the Group moved forward with placing the right person in the right position to take advantage of their strengths by focusing on building a system and environment that allows them to experience growth. This led to orders for a wide range of service projects, primarily in business process outsourcing (BPO).

As a result, net sales in this business amounted to ¥4,428 million (up 2.6% year on year) and operating profit was ¥612 million (up 16.4% year on year).

(iv) Business Solution Business

For this business, where the Group is primarily engaged in B2B sales of IT-related products and system integration services mainly for foreign-affiliated and medium-sized companies, the outlook is uncertain because of the high prices of resources and commodities. Even so, the number of projects related to the use of DX to increase productivity, reduce costs, and increase competitiveness is gradually trending upward.

Specifically, the Group was able to win a number of orders in the system integration business for various services including lift and shift, which is a type of the method of cloud migration, and server relocations.

Furthermore, the Group is now gradually becoming able to ship the servers and network products whose shipment had been delayed due to semiconductor shortages, and progress has been made in recording sales of services projects.

Furthermore, the Group received many inquiries relating to system development and maintenance and operation projects to digitalize corporations' businesses by making use of RPA and data linkage tools, as well as the security diagnosis and category-specific security services released last period, increasing the number of orders received.

As a result, net sales in this business amounted to ¥7,048 million (up 12.5% year on year) and operating profit was ¥523 million (up 45.8% year on year).

(v) Cloud Business

In this business, where the Group provides cloud solutions and original services to companies and other entities, and which is responsible for promoting the subscription business model, the Group received many inquiries regarding its Canbus. DX platform from companies promoting DX. Moreover, the Group began providing not only Canbus. for system overhauls, but also the "DX Design Lab" that can be used in spot applications from project consulting to management in PMO and BPO in promoting DX. By facilitating total solutions aimed at DX in addition to systematizing in Canbus., the Group received many inquiries.

Going forward, the Group will continue to promote aggressive investment and sales reinforcement in this priority offering area.

In addition, inquiries for the Cloudstep groupware, integrated with Google Workspace and Microsoft 365, have been increasing for rebuilding groupware architecture suited to post-COVID-19 office environments. At the same time, system integration, an area of strength for the Group, differentiates the Group from its competitors and results in orders.

As a result, net sales in this business amounted to ¥422 million (up 7.7% year on year) and operating profit was ¥57 million (down 8.4% year on year).

(vi) Overseas Business

In the U.S.'s Silicon Valley, companies are facing a challenging business environment amid financial instability with large-scale layoffs at tech companies, the collapse of multiple banks, and forecasts for further interest rate hikes. However, the Group's U.S. subsidiary has enjoyed strong orders from Japanese-affiliated firms located in Silicon Valley for proof of concept development and verification services to verify the effectiveness of elemental technologies owned by start-up companies. The Group has also received continued orders for system development and evaluation services from the manufacturing industry starting with automobile manufacturing, and the Overseas Business is strong.

ONE Tech, Inc., a U.S. company the subsidiary has invested in, focused on sales of its proprietary AI MicroAI™.

Regarding StrongKey, Inc., another U.S.-based company the subsidiary has invested in, its security support services based on data encryption and FIDO authentication have been newly adopted by major companies in the U.S., and it has also released the Public Key Infrastructure (PKI) service for secure

internet communications, which is compatible with the new “Matter” communication standard for smart homes. Inquiries from smart home IoT device and other related companies are increasing.

As a result, net sales in this business amounted to ¥36 million (up 8.5% year on year) and the operating loss was ¥2 million (versus operating loss of ¥10 million in the same period of the previous fiscal year).

(vii) Investment & Incubation Business

GaYa Co., Ltd., operates the horse racing game Keiba Densetsu for PCs and smartphones and designs and develops business applications for smartphones and tablets. In game operations in the first quarter, we held our first anniversary events for the smartphone game Keiba Densetsu PRIDE and revised and optimized our operating structure. Moreover, orders received for contracted development from existing customers were firm, and the Group newly participated in game development run by major publishers.

As a result, net sales in this business amounted to ¥48 million (up 44.9% year on year) and the operating profit ¥2 million (versus operating loss of ¥45 million in the same period of the previous fiscal year).

(2) Financial position

(Assets)

Total assets at the end of the first quarter of the fiscal year under review amounted to ¥46,644 million (versus ¥48,879 million at the end of the previous fiscal year), a decrease of ¥2,234 million from the end of the previous fiscal year. Current assets amounted to ¥40,326 million (versus ¥42,275 million at the end of the previous fiscal year), a decrease of ¥1,948 million from the end of the previous fiscal year. This was mainly due to a ¥1,541 million decline in notes and accounts receivable - trade, and contract assets, and a ¥326 million decline in cash and deposits. Non-current assets amounted to ¥6,317 million (versus ¥6,603 million at the end of the previous fiscal year), a decrease of ¥286 million from the end of the previous fiscal year. Property, plant and equipment amounted to ¥1,578 million (versus ¥1,622 million at the end of the previous fiscal year), a decrease of ¥43 million from the end of the previous fiscal year. Intangible assets amounted to ¥305 million (versus ¥317 million at the end of the previous fiscal year), a decrease of ¥12 million from the end of the previous fiscal year. Investments and other assets amounted to ¥4,433 million (versus ¥4,663 million at the end of the previous fiscal year), a decrease of ¥230 million from the end of the previous fiscal year. This was mainly due to a ¥358 million decrease in deferred tax assets and a ¥137 million increase in investment securities.

(Liabilities)

Total liabilities amounted to ¥12,197 million (versus ¥14,228 million at the end of the previous fiscal year), a decline of ¥2,031 million from the end of the previous fiscal year. This was mainly due to a ¥1,187 million decline in income taxes payable, an ¥832 million decline in accounts payable - trade, and a ¥697 million decline in provision for bonuses.

(Net assets)

Net assets amounted to ¥34,446 million (versus ¥34,650 million at the end of the previous fiscal year), a decrease of ¥203 million from the end of the previous fiscal year. This was mainly due to profit attributable to owners of parent of ¥1,220 million and dividends of surplus of ¥1,556 million. As a result, the equity-to-asset ratio increased 3.0 percentage points from the end of the previous fiscal year to 72.9%.

(3) Forward-looking forecasts, such as consolidated earnings forecasts

There have been no changes to the earnings forecasts for the full-fiscal year ending March 31, 2024 released on May 11, 2023.

If there are revisions in the future, notification will be promptly made.
